Marcus Henåker

Software Engineer

marcushenaker@gmail.com · marcushenaker.se · linkedin.com/in/marcus-hen%C3%A5ker-45b53a2a8 · github.com/Henakers · Gothenburg area, Sweden

Summary

[placeholder] Software engineer focused on backend and data engineering. I build the pipelines, integrations and validation that give analytics and AI accurate, trustworthy data.

Experience

Master Data Manager, [placeholder] Employer — 2026–present

- [placeholder] Sole owner of product data quality across internal systems and customer feeds.
- [placeholder] Built a system that makes data quality measurable: it scores [N] attributes on every article and took the overall score from [X] to [Y].
- [placeholder] Designed a supplier data pipeline with a canonical schema, per-supplier adapters and GTIN matching.
- [placeholder] Applied GS1 standards and automated validation, catching errors before customers ordered the wrong articles.

E-commerce Entrepreneur, Own Shopify business — 2023–2025

- [placeholder] Used sales and traffic data to drive pricing and marketing decisions.
- [placeholder] Chose and retired products based on measured margins and demand.

Assembly Technician, [placeholder] Previous employer — [placeholder] Years

- [placeholder] One line on the role.

Selected projects

- **Making product data quality measurable**: Placeholder: quality score up from 62% to 91%. marcushenaker.se/work/data-quality
- **One schema for every supplier feed**: Placeholder: 12 suppliers mapped onto one canonical schema. marcushenaker.se/work/supplier-data-pipeline
- **Where data quality gets lost**: Placeholder: a repeatable method, later applied at work. marcushenaker.se/work/degree-project · Code: github.com/Henakers

Skills
